Modello Contour Design

Modello by Millboard is a groundbreaking innovation that has reimagined what decking can be. Blending beauty with versatility, Modello offers a transformative solution for outdoor spaces.

The range comes in two board types - Linear and Contour. Both board types have the same dimensions and work on the same geometric layout, Linear has straight design lines whereas Contour has curved lines.

The boards have a design pattern that works out at 200mm, with the design rotated every 600mm so will work at 400mm and 300mm centres, depending on the overall pattern selected. The boards are 196mm wide, however the spacing works to 200mm with a 4mm gap between boards.

The Modello Deck boards are marked along each side with either an **X** or a **O** every 400mm. This is to facilitate correct installation and ensures that depending on the pattern requirements the boards are facing the right direction when being installed.
